Hi. I have a portable scanner/PC Scanner Scan-Flex. It used to work well on Windows 7 Pro 64bit, but now it won't. All the scans were good. But now when I scan a document/document, it's scanning all black or blank, and when I preview the images, it tells me that it cannot save the image to the folder it's supposed to save in, due to a "File is busy". What can I do? It's an old laptop, but I'm sure it's good enough for scanning. Hi, I have a problem. I can see "Read all devices", I can choose with "Scan" button but when I click in "Read all devices" icon, I just see "No device found" nothing happens. I've reinstalled all the drivers. I've tested in different windows versions. The printer is HP LaserJet 1100 MFP. Hello. I have a HP LaserJet 1250 MFP. I've installed the printer in my PC. But the only thing it's printing in black and white only. I've configured the printer in Windows 7. Hi, I have a problem. I can see "Read all devices", I can choose with "Scan" button but when I click in "Read all devices" icon, I just see "No device found" nothing happens. I've 82157476af
